- Intuitive user interface with communications capability
- Room-by-room control
- Customizable screens / period settings
- 5-day weather forecasts and weather alerts
- Remote access
- Records heating and cooling run-time costs
- Connects to wireless home network
- Controls digital locks, cameras, and light modules
- Air clean mode works with Trane Clean Effects Clean Air System
- Zone your home to heat and cool only the rooms you use

Call us today to get YOUR ComfortLink II Installed!

There's no better salesperson than a happy customer. We are proud many of our new customers have come to us by referral. If you know someone who is thinking about replacing their furnace, central air system or heat pump tell them about us. If we install new equipment for them we will send you a **referral reward up to \$300!**

MONEY SAVING TIP!

If your HVAC equipment is more than 10 years old or not keeping your house comfortable, have it evaluated by a professional HVAC contractor. If it is not performing efficiently or needs upgrading, consider replacing it with a unit that has earned the ENERGY STAR. Depending on where you live, replacing your old heating and cooling equipment with ENERGY STAR qualified equipment can cut your annual energy bill by nearly \$200!

Did you know...

We all know washing hands often is a great way to fight off viruses & bacteria. But did you know that there's a link between your health & the quality of your home's air? There is never a sure-fire way of avoiding sickness all of the time but the chances on contracting may be greatly reduced if your home's indoor air quality (IAQ) is kept at a healthy level.

The U.S. Environmental Protection Agency says air purification systems are important for maintaining healthy indoor air. Having these systems installed can be highly efficient in reducing airborne viruses, bacteria, germs, allergens and other pollutants. Air purifiers are strongly suggested for anyone who suffers from asthma or allergies. For pricing on our air purification systems or to schedule an install of one contact us.

What's **wrong** with these pictures?

Look closely at these photos to find some common comfort mistakes. You may recognize something similar in your home! Read the explanations to help make your home comfortable and safe – and save money too!

What's Wrong:

This woman thinks she has the flu. But she's been exposed to something much more dangerous.

Make it right: Because many symptoms of **carbon monoxide poisoning** mimic the flu-fatigue of the situation.

That's why it's important to have **carbon monoxide detectors** in your home—especially in your bedrooms. If the detectors sound an alarm, ventilate the home with fresh air right away. To ensure your safety, be diligent about having regular maintenance done on your heating appliances.

What's Wrong:

DUST!

It doesn't mean you are bad at housekeeping, it could be a sign that it is time to change your heating/cooling system filters.

Make it right: Change or clean your heating or cooling filters about once a month. Have your home evaluated for any duct leaks. Look into a high efficiency air filtration system that will capture dust and other airborne particles.

Sopapilla Cheesecake

Looking to add something new on the menu, try this delish Sopapilla Cheesecake!
Enjoy!

2 cans crescent rolls

1-8 oz pkg cream cheese

1 cup sugar

1 ½ stick butter

Cinnamon & sugar

Spray Pam in bottom of 9x11 pan, sprinkle cinnamon & sugar on bottom over Pam.

Roll one can of crescent rolls out in bottom of pan (press seams together to make one large square of dough) Mix cream cheese, sugar and 1 stick of butter together until fluffy.

Spread over crescent rolls, roll out second can of crescent rolls and lay over cream cheese mixture. Sprinkle with cinnamon & sugar add a few pads of butter on top. Bake on 350 until golden brown or bubbly.
