CHECK OUT our **HEATING, AC, and AIR Quality Specials** at
www.BrandonsAC.com

Why Maintenance?

- 9 out of 10 system failures are caused by dirt and dust.
- 1 out of every 6 people who suffer from allergies do so because of the direct relationship to the dirt and bacteria in a heating system.
- Indoor air is found to be 70 times more polluted than outdoor air.
- If your heating system is covered by a manufacturer warranty; maintenance is required twice a year.
